

Banking System Functional Testing Document

Prepared by: Nontlantla
Date: 07 October 2025

1. Test Plan

Introduction: This document covers the functional testing of a simple banking system application including login, balance inquiry, deposit, withdrawal, fund transfer, and transaction history.

Objectives: To verify that all functional requirements of the banking system are met.

Scope: Functional testing of core modules: Login, Balance, Deposit, Withdraw, Fund Transfer, Transaction History.

Features to be Tested: Functional modules listed in scope.

Features Not to be Tested: Non-functional aspects such as performance, security, and usability.

Test Approach: Manual functional testing based on predefined test scenarios and test cases.

Test Environment: Windows 10, MySQL database, Java backend, Web frontend.

Roles & Responsibilities: Tester – Nontlantla.

Entry Criteria: Application build deployed and stable.

Exit Criteria: All planned test cases executed with major defects resolved.

Deliverables: Test plan, scenarios, cases, scripts, data, bug report.

2. Test Scenarios

Scenario ID	Description
TS01	Verify login with valid credentials
TS02	Verify login with invalid credentials
TS03	Verify balance inquiry displays correct amount
TS04	Verify deposit updates account balance
TS05	Verify withdrawal decreases balance
TS06	Verify fund transfer between accounts
TS07	Verify transaction history displays past operations

3. Test Cases

Case ID	Scenario	Preconditions	Steps	Expected Result	Status
TC01	TS01	User registered	Enter valid username/password	Dashboard is displayed	Pass/Fail
TC02	TS02	User registered	Enter invalid username/password	Error message displayed	Pass/Fail
TC03	TS04	Account active	Deposit 100	Balance increased by 100	Pass/Fail

TC04	TS05	Account has funds	Withdraw 50	Balance decreased by 50	Pass/Fail
TC05	TS06	Two accounts active	Transfer 200	Source decreases 200, target increases 200	Pass/Fail

4. Test Scripts

Example: Test Script for Login
Step 1: Navigate to login page.
Step 2: Enter username and password.
Step 3: Click 'Login' button.
Step 4: Verify dashboard is displayed.

5. Test Data

Username	Password	Account Number	Balance
user1	pass123	ACC1001	1000
user2	test456	ACC1002	500
user3	demo789	ACC1003	2000

6. Bug Report

Bug ID	Title	Severity	Steps to Reproduce	Actual Result	Expected Result	Status
BUG01	Login fails with valid credentials	High	Steps: Enter correct username and password	Dashboard not displayed	Dashboard should be displayed	Open
BUG02	Balance not updated after deposit	Medium	Steps: Deposit 100	Balance unchanged	Balance should increase by 100	In Progress
